Nancy, Thank you.

Fitz, if I understand correctly, the IOAA will be seeing this document next week.

FYI. Most comments in redline.

This one is very important to our pesticides program.

Subject: OCSPP response: Systematic Review Protocol for the Inorganic Arsenic IRIS Assessment Charge Questions for Review

Hi Vicki,

Attached are comment from OCSPP on the Systematic Review Protocol for the Inorganic Arsenic IRIS Assessment Charge Questions.

OCSPP thanks IRIS for the brief extension granted due to the recent holiday period. OCSPP is very interested in this topic and we wanted to make sure that appropriate staff was available to review the charge questions and provide comments.

Please let us know if you have any questions.

Thanks,
Karen

Subject: RE: Systematic Review Protocol for the Inorganic Arsenic IRIS Assessment Charge Questions for Review

Hi Karen,

Thank you for your email. Our timeline is really tight, so we are going to request that agency comments be provided by **4/25 noon** at the latest. The document is only 3 pages long and includes 6 charge questions. Just for your background, the primary requesting offices, OW and OLEM, have already provided comments. Also, Nancy reached out for access to the SharePoint site – did you already provide the document to her?

Thanks - please reach out with any questions,
Vicki

Subject: RE: Systematic Review Protocol for the Inorganic Arsenic IRIS Assessment Charge Questions for Review

Hi Vicki,

I informed my office contacts about the IRIS request for comments on the draft charge questions. But I heard back immediately from the OCSPP IO that a number of staff and management will be on leave for the holidays during this week and over the extended weekend which includes Monday, April 22nd. So trying to review and respond in a consolidated fashion by Wed the 24th, as IRIS requests, is asking a lot.

We respectfully ask for additional time to review this document (until Monday, April 29th) or at least until Friday, April 26th.

Thanks,
Karen

Subject: Systematic Review Protocol for the Inorganic Arsenic IRIS Assessment Charge Questions for Review

Dear Colleagues –

We are pleased to provide the charge questions for the Systematic Review Protocol for Inorganic Arsenic. We request that comments focus only on substantive issues and that all comments from within an office or region be combined into a single document. We also ask that all comments be provided by **COB Wednesday, April 24**. As you may remember, we are preparing for the NAS review of the problem formulation and systematic review protocol on July 16, 2019 so the timing is particularly urgent to finalize materials for that review (see <https://www8.nationalacademies.org/pa/projectview.aspx?key=51375>). Recall that we provided of the Systematic Review Protocol for the Inorganic Arsenic IRIS Assessment (Part a. Updated Problem Formulation and Systematic Review Methods; Part b. PBPK and Dose-Response Methods) for review on December 20.

For your convenience, the charge questions can be found on the IRIS Agency Review SharePoint site, located [here:https://usepa.sharepoint.com/sites/ORD_Work/IRISagencyreview/SitePages/Home.aspx](https://usepa.sharepoint.com/sites/ORD_Work/IRISagencyreview/SitePages/Home.aspx) (see the Review Documents section).

If you have specific comments you would like to highlight, please provide those comments in one document and upload them to this same SharePoint site. Please remember, this review is focused on the charge questions related to the Systematic Review Protocol of iAs. We will have additional opportunities in the future to engage during actual assessment development.

- For ease of document management, only those listed as IRIS Agency Reviewers have access to the site.
- Post all comments to the SharePoint site by **COB Wednesday, April 24**. Due to the timing of the scheduled NAS meeting, we will NOT be able to extend this deadline. Please focus on comments pertaining to the overall revised scope of the assessment.

Thank you for your participation in EPA's IRIS Program. We appreciate your scientific input on IRIS documents. Please let us know if you have any questions.

Vicki Soto
